

MM60

MicroStrip™ Machine

The specially designed MicroStrip™ machine MM60 ensures a very accurate, constant and gradual flow of all fine media like Armex®

Features

- CE marking on machine
 - CE pressure vessel approval
 - 1½" piping
 - 40 micron inlet filter with automatic drain
 - Accurate pressure regulator
 - Accurate gate valve
 - Choke valve
 - Two non-return valves
 - Thompson metering valve for multi media
 - Glycerin filled gauges for system-, tank- and blast pressure
 - Pressure differential gauge (Capsuhelic)
 - Silencer on decompression valve
 - Pressure safety valve
 - Pneumatic ball vibrator for an ensured flow
 - Water filter
 - 20 meters hose package with 1" blasthose
 - Silicon Nitride nozzle UB-6 (9,5 mm) with a water injecting tip.
- Overall dimensions: 700 x 600 x 1250 mm
• Contents: 60 liters
• Weight: 80 kg.

Options

- Stainless steel water pump 1:3 or 1:9
- Membrane water pump 1:1
- 'Third signal' on machine or hose package for flush function (air & water only)
- Hose extension
- Helmet air filter
- Digital hour counter
- Timer for delayed media on and delayed air off.
